

Veteran Housing Referrals & Partnerships

Restoring Homes. Restoring Lives. Rebuilding Communities.

What Restore provides

Fully furnished shared housing for veterans in Philadelphia, with practical resident support. Restore Communities receives veteran housing referrals from VMC, VA hospitals, and other veteran housing and community partners, and coordinates with referring professionals to discuss housing needs, current availability, and next steps.

Who can refer?

- VMC representatives.
- VA hospital case managers and social workers.
- Veteran housing and service organizations.
- Community housing partners and case managers.

Veterans and family members may contact Restore directly to ask about housing.

Please do not send

Social Security numbers, dates of birth, medical information or records, discharge documents, identification documents, or financial account information by email or through the website forms.

How a referral works

1. The referring professional submits their own contact information and organization.
2. Restore contacts the professional to discuss the referral and current housing availability.
3. Necessary resident information and documents are exchanged through an appropriate secure process.
4. Restore coordinates next steps with the veteran and referring partner.

Referrals are reviewed individually. Availability, eligibility, and any housing assistance must be confirmed before placement.

Contact us for current availability. These are referral relationships. They do not imply VA approval, government endorsement, a formal contract, or guaranteed funding, and Restore does not promise immediate placement. Contact our team to confirm current costs, utilities, accessibility features and program length.
